

Agenda for the modernisation

To support the modernisation of our institution we will pursue the following objectives:

1. Increasing attainment levels to provide the graduates and researchers Europe needs

We will participate in a campaign to explain students finishing Compulsory Secondary Education the opportunities and benefits to pursue vocational training, so that successful students will be interested in this type of study. We will focus, particularly, on female students.

2. Improving the quality and relevance of higher education.

Keeping in touch with former students; monitor their achievements and their difficulties in order to foster our students' competences and skills needed for the job market.

3. Strengthening quality through mobility and cross-border co-operation.

Ensuring the dissemination of both students and teachers mobilities, emphasizing the added values of mobilities and explaining how they overcame difficult situations.

4. Making the knowledge triangle work: linking higher education, research and business for excellence and regional development.

Strengthening collaborative work with professionals of the social and integration team from our district and establishing links with researchers from the Pedagogy Faculty of the University of Barcelona.

5. Improving governance and funding

Promoting participation in some external activities that could add funding resources to our organisation, like presentations or contests.
